

# FLEXIBLE VIBRATING POKER

SA manufactured to exact European standards

All wearing parts heat treated

Heavy duty rubber and spring steel stiffeners used to reduce kinking

MODEL	TYPE
IP 28	28MM VIBRATING NEEDLE
IP 45	45MM VIBRATING NEEDLE
IP 50	50MM VIBRATING NEEDLE
IP 60	60MM VIBRATING NEEDLE

## What is a Poker Vibrator?

A poker vibrator consist of an electric weight encased in a housing and may be driven by an electric or a petrol or diesel engine. Poker diameters range from 25 to 75 mm.

A concrete vibrator is a construction tool typically used on concrete pouring sites. The vibrators are used to ensure that the pour is free of air bubbles and even.

## **How To Use Poker Vibrator?**

Insert the vibrator quickly. When compaction is complete, withdraw it slowly to avoid leaving a hole.

Compaction is complete when the surface of the concrete gets a water sheen and air bubbles no longer break through it.

Concrete must be placed in layers and the tip of the poker must penetrate the layer below to knit the concrete.
